

BACKGROUND PAPER

World Health Organization

WHO · Science Block, Room 12

TOPIC 1

Strengthening the pandemic preparedness and response accord

TOPIC 2

Addressing antimicrobial resistance as a global health emergency

The World Health Organization coordinates the international response to health emergencies and sets the technical standards states build their systems around. This committee rewards delegates who can translate scientific evidence into workable policy, and who understand that financing, manufacturing capacity and equitable access decide whether a good framework ever reaches a patient.

Full background paper coming soon.

The Secretariat will publish the complete guide — including the history of the question, bloc positions and questions a resolution must answer — before the conference. Delegates should begin their own research in the meantime.
